

2020 Mustang® Maxx Insecticide, Stallion® Brand Insecticide & Steward® EC Insecticide Alfalfa Assurance

PROGRAM DESCRIPTION

An early application of Mustang® Maxx insecticide, Stallion® Brand insecticide or Steward® EC insecticide in alfalfa for control of weevils followed by a later application of Steward EC insecticide for extended residual control is a best practice for effective management of alfalfa weevil damage in alfalfa. By managing insect populations early, it allows alfalfa to grow vigorously, improving tonnage and hay quality that can pay dividends throughout the growing season.

When one of the following combinations of treatments are applied within the labeled timing and a third application is determined to be required prior to making the first cutting due to economical infestation of weevils – such determination must be made solely by an FMC representative or an FMC authorized agent – FMC will cover up to \$6.00/A for the third treatment.

Qualifying Product	Assurance Benefit
Steward EC insecticide 5.3 oz./A* followed by Steward EC insecticide 6 fl. oz./A*	Up to \$6.00/A
Mustang Maxx insecticide 4 fl. oz./A followed by Steward EC insecticide 6 oz./A*	
Stallion Brand insecticide 11.75 oz./A followed by Steward EC insecticide 6 oz./A*	

*Steward EC insecticide's federal label states 6.7 fl. oz. as the minimum rate for control of alfalfa weevils. The reduced rates in this program are pursuant to a 2EE recommendation R-1822 for the following states: AZ, Imperial and Riverside Counties in CA, CO, ID, KS, MO, MT, NE, NV, NM, OK, OR, UT, WA and WY. Texas is covered under a separate 2EE recommendation R-1825. <http://www.cdms.net/Label-Database>
