

2021 Overlapping Residual Soybean Herbicide Assurance

FMC OVERLAPPING OR LAYERED RESIDUAL HERBICIDE ASSURANCE GUIDELINES

The FMC Overlapping Residual Soybean Assurance Program is designed to encourage growers to use sound weed management by applying residual herbicides before soybean emergence and then follow with a second residual herbicide in combination with a postemergence (POST) herbicide before weeds reach 4-inches tall within 30 days of soybean emergence. Growers who follow the FMC Overlapping Residual Soybean Herbicide Assurance recommendations at the minimum specified rate depending on use timing – see table below – will be eligible for an assurance payment up to \$15.00/A if the treatment does not maintain commercially acceptable 90% control of labeled weeds versus an untreated check within 15 days after the early post application. The assurance funds are to be used toward a clean-up application to achieve acceptable weed control. The assurance claim must be reported **within 15 days after the early post application**. Spring preplant or preemergence applications must include labeled rates of Roundup® + 1.0 pt./A of 2,4-D or dicamba w/wo 1.0 fl. oz./A of Aim® EC herbicide to control emerged weeds. Follow all appropriate plant-back restrictions when using 2,4-D and dicamba products in soybeans according to labeling and soybean trait package.

Overlapping Residual Soybean Herbicide Recommendation		Assurance Payment
Apply preplant, preemergence, PPI. Minimum Use Rate	Apply early POST before weeds are 4-inches tall. Minimum Use Rate	
Authority® Supreme herbicide – 7 oz./A*** Authority® Edge herbicide – 7 oz./A*** Authority® XL / Maxx / First DF herbicides – 5 oz./A Authority® Assist herbicide – 8 fl. oz./A Authority® Elite herbicide – 26 fl. oz./A Authority® MTZ DF herbicide – 14 oz./A Spartan® Charge herbicide – 7 oz./A	Anthem® MAXX herbicide – 3 fl. oz./A*** + Labeled and recommended use rate of one of the following appropriate for the trait technology. <ul style="list-style-type: none"> *Roundup PowerMAX® herbicide *Liberty® herbicide *Dicamba formulation(s) approve for over-the-top applications to soybeans. Enlist One® herbicide or Enlist Duo® herbicide <p><small>¹ Due to widespread glyphosate resistance in weeds, glyphosate must be tank mixed with other appropriate broadleaf herbicide(s) at full labeled rates to attain post weed control according to local recommendations. Glyphosate alone cannot be used as the only post herbicide program.</small></p> <p><small>Some FMC products covered by this assurance program may not be approved for tank mixing with labeled over-the-top formulations of dicamba, Enlist One herbicide, or Enlist Duo herbicide at the time of this document publishing. Check appropriate tank-mix product websites for up-to-date list of approved tank-mix partners.</small></p>	Up to \$15.00/A

*Or equivalent glyphosate/glufosinate/dicamba brand at the label rate.

*** A combination of Authority Supreme or Authority Edge herbicides followed by Anthem MAXX herbicide on medium or fine soils cannot exceed 0.186 pounds of pyroxasulfone active per acre in a year. See product label or FMC representative for full product use information.

2021 Overlapping Residual Soybean Herbicide Assurance

PROGRAM REQUIREMENTS

1. A grower must complete both parts of a two-pass weed control program specified above before assurance program/claim is in effect. If inadequate weed control is attained after the in-crop application is made, then FMC will investigate the claim.
2. An authorized FMC representative must be notified of a claim **within 15 days after the early post application is made**, prior to the established deadline and have a reasonable opportunity to inspect prior to any additional product applications. The authorized FMC representative must confirm inadequate product performance.
3. Assurance benefit is for product costs only. Application and other related costs are excluded from assurance payments.
4. Leave a representative check strip in each field for comparison and mark its location.
5. Products must be applied according to label use directions and in accordance with local FMC recommendations.
6. Growers/retailers must provide proof that all products were applied at appropriate timing where sequential application programs are recommended.
7. Record and save product lot or batch numbers.

Program Period:	October 1, 2020 - July 15, 2021
Program Geography:	Nationwide
Claim Submission Deadline:	July 15, 2021
Program Payment Date:	30 days after claim submission to FMC

PROGRAM RULES & CONDITIONS

1. FMC reserves the right to change any or all features of this program at any time.
2. Proof of purchase is required. Only FMC branded products purchased from FMC authorized distributors or retailers and reported by electronic reporting methods are eligible for payment under this program.
3. Only product purchased for resale to growers is eligible for payment under the terms of this program.
4. FMC reserves the right to audit all claims. Misreported sales of any type are a clear violation of this program and will be subject to audit and possible forfeiture of any and all program benefits.
5. FMC is in no way liable or responsible for any grower failure to pay the retailer.
