

2020-2021 Fall & Spring Residual Soybean Herbicide Assurance

FALL PROGRAM DESCRIPTION

Growers who follow the FMC Fall and Spring Weed Management recommendations at the minimum specified rate depending on use timing (see table below) will be eligible for up to a \$15.00/A assurance payment if the treatment does not maintain commercially acceptable 90% control of labeled weeds versus an untreated check after an appropriate POST treatment is applied in the spring. The assurance claim must be reported within 30 days after the in-crop post application is applied.

- *Fall applications must include labeled rates of *Roundup PowerMAX® herbicide + 1.5pt./A of 2,4-D or 16 oz./A of dicamba to control emerged weeds. Spring applications to no-till/minimum till fields must contain 2,4-D LV4 @ 16 oz./A or dicamba at labeled rates to control emerged broadleaf weeds.*

Fall Season Application	Spring Season Application	Assurance Payment
<p>Apply after Oct. 1, 2020</p> <p><i>Minimum Use Rate</i></p>	<p>Following a fall application, a spring application applied either preplant, preemergence, PPI, or early post is required as part of two-pronged residual approach. Choose a preplant/preemergence product from the list below OR apply Anthem® MAXX herbicide as an early post application. If a product containing an ALS (Group 2) herbicide is used in the fall application, it is NOT recommended that you follow again with an ALS (Group 2) containing herbicide in the spring preplant/preemergence application.</p> <p><i>Minimum Use Rate</i></p>	
<p>Authority® XL herbicide OR Authority First DF herbicide 3.2 oz./A OR Authority MTZ DF herbicide 10 oz./A OR Spartan® Charge herbicide 6.0 fl. oz./A</p>	<p>Preplant, PPI, Preemergence Options***</p> <ul style="list-style-type: none"> • Authority Supreme herbicide – 7.0 fl. oz./A • Authority Edge herbicide – 7.0 fl. oz./A • Authority First DF herbicide, Authority XL herbicide, Authority Maxx herbicide – 5.0 oz./A • Authority Elite herbicide – 26.0 oz./A • Authority Assist herbicide – 8.0 fl. oz./A • Authority MTZ DF herbicide – 14.0 oz./A • Spartan Charge herbicide – 7.0 fl. oz./A • Anthem MAXX herbicide – 4.0 fl. oz./A <p>Early POST Option: ** Anthem MAXX herbicide 3 fl. oz./A +</p> <p>Labeled and recommended use rate of one of the following (or similar) appropriate for the trait technology.</p> <ul style="list-style-type: none"> • *Roundup PowerMAX herbicide OR • *Liberty® herbicide OR • *Dicamba formulation(s) approved for over-the-top applications in soybeans. Enlist One® herbicide or Enlist Duo® herbicide <p><i>¹Due to widespread glyphosate resistance in weeds, glyphosate must be tank mixed with other appropriate broadleaf herbicide(s) to attain post weed control according to local recommendations. Glyphosate alone cannot be used as the only post herbicide program.</i></p> <p><i>Some FMC products' covered by this assurance program may not be approved for tank mixing with labeled over-the top formulations of dicamba, Enlist One herbicide or Enlist Duo herbicide at the time of this document publishing. Check appropriate tank-mix product websites for up-to-date list of approved tank-mix-partners and labeling requirements.</i></p>	<p>Up to \$15.00/A</p>

* Or equivalent glyphosate/glufosinate/dicamba brand at the label rate.

** Labeled, full rates of postemergence broadleaf herbicides are required to control emerged weeds.

*** Be sure to check individual product labels and **DO NOT** exceed the maximum total use rate allowed per year when using the same product more than once in a 12-month period.

2020-2021 Fall & Spring Residual Soybean Herbicide Assurance

1. Both fall and spring applications must follow label use rates, application timing and be tank mixed with appropriate burndown herbicides to control emerged weeds.
2. An early post application of glyphosate, glufosinate, dicamba, or Enlist™ product (according to soybean trait tolerance) is required after the spring season residual application. If unacceptable control is achieved after the post application is made, then FMC will provide appropriate assurance funds to help achieve weed control.
3. Products must be applied according to label use directions and in accordance with local FMC recommendations. Make sure that all products listed are fully labeled and approved for use before use. At time of this program, some dicamba products may not be approved for use for 2021 use season.
4. Growers/retailers must provide proof that all products were applied at appropriate timing where sequential application programs are recommended.
5. Record and save product lot or batch numbers.

Program Period: October 1, 2020 to July 15, 2021

Program Geography: Nationwide

Claim Submission Deadline: July 15, 2021

Program Payment Date: 30 days after claim submission to FMC

PROGRAM RULES & CONDITIONS

1. FMC reserves the right to change any or all features of this program at any time.
2. Proof of purchase is required. Only FMC branded products purchased from FMC authorized distributors or retailers and reported by electronic reporting methods are eligible for payment under this program.
3. Only product purchased for resale to growers is eligible for payment under the terms of this program.
4. FMC reserves the right to audit all claims. Misreported sales of any type are a clear violation of this program and will be subject to audit and possible forfeiture of any and all program benefits.
5. FMC is in no way liable or responsible for any grower failure to pay the retailer.
